Citation Summary

Reference No.	Paper Name	Occurrences
[1]	Layer normalization	1
[2]	CoRR, abs/1409.0473	5
[3]	Massive exploration of neural machine translation architectures	2
[4]	Long short-term memory-networks for machine reading	1
[5]	Learning phrase representations using rnn encoder-decoder for statistical machine translation	2
[6]	Xception: Deep learning with depthwise separable convolutions	1
[7]	Empirical evaluation of gated recurrent neural networks on sequence modeling	1
[8]	Recurrent neural network grammars	0
[9]	Convolutional sequence to sequence learning	8
[10]	Generating sequences with recurrent neural networks	1
[11]	Deep residual learning for image recognition	1
[12]	Gradient flow in recurrent nets: the difficulty of learning long-term dependencies	2
[13]	Long short-term memory	1
[14]	Self-training PCFG grammars with latent annotations across languages	0
[15]	Exploring the limits of language modeling	1
[16]	Can active memory replace attention	1
[17]	Neural GPUs learn algorithms	1
[18]	Neural machine translation in linear time	4
[19]	Structured attention networks	1
[20]	Adam: A method for stochastic optimization	1
[21]	Factorization tricks for LSTM networks	1
[22]	A structured self-attentive sentence embedding	1
[23]	Multi-task sequence to sequence learning	0
[24]	Effective approaches to attention-based neural machine translation	1
[25]	Building a large annotated corpus of english: The penn treebank	1
[26]	Effective self-training for parsing	0
[27]	A decomposable attention model	2
[28]	A deep reinforced model for abstractive summarization	1

Reference No.	Paper Name	Occurrences
[29]	In Proceedings of the 21st International Conference on Computational Linguistics and 44th Annual Meeting of the ACL, pages 433–440. ACL, July 2006	0
[30]	Using the output embedding to improve language models	1
[31]	Neural machine translation of rare words with subword units	1
[32]	Outrageously large neural networks: The sparsely-gated mixture-of-experts layer	2
[33]	Dropout: a simple way to prevent neural networks from overfitting	1
[34]	End-to-end memory networks	1
[35]	Sequence to sequence learning with neural networks	2
[36]	Rethinking the inception architecture for computer vision	1
[37]	Grammar as a foreign language	2
[38]	Google's neural machine translation system: Bridging the gap between human and machine translation	8
[39]	Deep recurrent models with fast-forward connections for neural machine translation	2
[40]	In Proceedings of the 51st Annual Meeting of the ACL (Volume 1: Long Papers), pages 434–443. ACL, August 2013	0
